

An Introduction to Infinite Facade

 **INFINITE FACADE™**

**Infinite
possibilities™**

Infinite Facade

Infinite Facade has been expertly designed to meet the needs of building owners, designers and builders to take advantage of prefabrication.

The system combines design flexibility with a standardized frame and high tolerance connections to ensure constructability and reduce risk. Optimized to accommodate full height windows, it includes factory installed insulation, firesafing, finishes and installed on-site for an integrated high performing envelope solution.

Either C-CAPP or GFRC can be used on the Infinite Facade frame for a full range of geometric and aesthetic flexibility.

KEY BENEFITS

- Aesthetic flexibility, for both materials and finishes
- Resilient and durable materials
- Reduces the load on the structure
- Integrates well with adjacent systems
- Highly energy-efficient system with lower operating costs
- Sustainable design, contains 20% less carbon than traditional concrete systems
- Windows pre-installed in the factory
- Single point of contact for the building envelope warranty

BENEFITS OF PREFABRICATION

- Reduces site impacts
- Accelerates construction schedules
- Ensures constructability
- Provides budget certainty
- Factory quality
- Reduces risk
- Streamlined logistics and shipping processes

Multiple Scopes Single Source Solution

+ 100s more!

Finishes

Our exterior finish options are limitless. In addition to the wide variety of colors and textures currently available in traditional precast, other materials can be cast into the exterior veneer – such as brick, terracotta, and stone. The use of form liners also allows for an endless number of geometric patterns and reveals to be incorporated into the design.

Aesthetic Customization

 **1** Pick the texture you like.   **2** Choose your color scheme.   **3** Select your finish style.

Glazing elements

Choose from an array of stunning glazing elements to build the perfect facade. Our glazing systems have exceptional water and air penetration resistance.

The panel and the window are designed as a single solution, creating an elegant but durable exterior.

Select from flush and recessed designs with spandrel, colored, and fritted glazing options to meet your project goals.
